IMPORTANT

Late Running of Trains on Suburban Lines

Punctual timekeeping of trains in the suburban area is of paramount importance. The co-operation of train crews and station staffs can materially assist in the elimination of avoidable delays and thus remove the cause for the complaints which the irritation of late running creates.

Barrier gates must be closed immediately on arrival of trains at intermediate stations.

Whenever a detention of 1 minute or over occurs to an electric train (Up or Down) on any line the Train Controller must be IMMEDIATELY notified in order that corrective action may be taken to ensure the maintenance of scheduled services.

Guards must, IMMEDIATELY on arrival at Flinders Street or other terminal stations furnish to the Officer-in-Charge at terminals or to the Platform Supervisor on the respective platforms at Flinders Street or Princes Bridge, as the case may be, complete details of late arrival of 2 minutes or more on T.R. 34 (Guards' Late Running Report).

The latter must then telephone these particulars to the Train Controller.

GENERAL INFORMATION

A copy of every new issue of a WORKING TIME-TABLE BOOK, or section of a Book, or amendment thereto, is to be supplied to all concerned in accordance with Regulation 8.

It is imperative that each Stationmaster carefully check this Time-table, regarding the timing of trains, crossing arrangements, &c., insofar as his own station or the stations he supervises are concerned. He will be held responsible for promptly bringing under the notice of the Assistant Chief Traffic Manager (Subn.) and Manager Suburban Train Operation's or District Superintendent, any inaccuracies that may appear herein.

WALL SHEET TIME-TABLES issued in conjunction with this book, are to be posted in a prominent position at a height from the ground and in the close proximity of a light, to enable passengers to consult it with facility. A red line must be ruled on each time-table under the name of the station concerned, and time applying to it.

PASSENGER, RAIL MOTOR AND MIXED TRAIN RUNNING.—Depot stations must obtain full particulars from Guards of the late running of Passenger, Rail Motor and Mixed trains. In the case of a Rail Motor run without a Guard, the necessary particulars shall be obtained from the Driver. In the event of any time being lost by the locomotive, the cause, also locomotive number and class, must be ascertained from the Driver, and the Train Controller advised. Drivers will require to explain the cause of any time lost that in the agregate exceeds the time gained on the journey.

When a Passenger, Rail Motor or Mixed train is blocked at a roadside station, the Train Controller must be advised by the Stationmaster at the station at which the block occurred, and if the train that caused the block was running late the cause of such late running (whether overtime in section or other cause) must be given if ascertainable.

SUBURBAN PASSENGERS NOT TO TRAVEL BY COUNTRY TRAINS.—Country trains including Rail Motor and Locomotive hauled Passenger Trains, shown in the Northern and Midland, Western and South Western, North Eastern and Eastern Working Time-table books are not available for inter-station passenger travel within the electrified Suburban area unless otherwise shown. One-class suburban ticket holders are not permitted to travel in first-class carriages of country trains.

FAST NEWS-GOODS TRAINS.—Passengers must not be allowed to travel by the Fast News Goods trains, as set out hereunder, unless authorised by the Board or the Chief Traffic Manager.

Members of both Houses of the Federal and State Parliaments are, however, exempt from the foregoing prohibition and may be permitted to travel on these trains, as required.

The trains referred to are:—

1.30 a.m. (No. 15, 15A), Northern; 12.20 a.m. (No. 35, 35A), and 1.10 a.m. (No. 113) Eastern.

SCHEDULED STOPPING ARRANGEMENTS FOR COUNTRY PASSENGER SERVICES.—The instructions regarding action to be taken by trainmen concerning "if required" stops when necessary for passenger purposes etc., are shown on page 73 of W.T.T. Addenda.

INSTRUCTIONS TO BE OBSERVED IN THE EVENT OF FOG ARISING.

1. **Speed of Trains.**—In foggy weather, or when, from any cause, a good and distinct view of the Fixed Signals cannot be obtained, the maximum rate of speed of any train when entering or passing a station in the suburban area must not exceed 15 miles per hour. This is subject to the observance of Regulations 167, 168 and 170.

2. During foggy weather units are not to be detached from trains running on the lines on which the fog exists, except as directed by the Manager Suburban Train Operations.

FORMAT OF METROPOLITAN DISTRICT WORKING TIME-TABLE

The Metropolitan District Working Time-table is issued in two parts—Part I containing the Mondays to Fridays service (white pages) and the General Instructions (blue pages) whilst Part II contains the Saturdays service (yellow pages) and Sundays service (green pages).

The time-table matter has been arranged with Flinders Street as the focal point and stations which are served by trains that run to termini on different lines will have the full time-table in the one place. The only exception to this is Richmond which appears in two sections due to space considerations.

As far as practicable trains are shown strictly in time order throughout the time-table. This includes all country passenger trains, all suburban goods trains and certain country express and fast goods trains.

The main sections, which contain all the passenger trains that pass through, are:—

(a) Spencer Street and North Melbourne (Williamstown Pier, St. Albans, Altona, Broadmeadows and Upfield lines)
(b) South Yarra (Sandringham, Frankston and Pakenham lines)
(c) Burnley (Lilydale, Belgrave, Alamein and Glen Waverley lines)
(d) Clifton Hill (Hurstbridge and Epping lines), and the
(e) Port Melbourne and St. Kilda lines have been combined.

Where multiple running tracks exist each train is shown at that point and wherever changes occur which track it is scheduled to operate over.

GENERAL NOTES

TIMING OF TRAINS

Timings shown in **bold** type thus—**1 34**—indicate the times trains are due to arrive at and /or depart from the various stations, junctions, etc., after a regular stop (excepting trains which are just commencing running). **Where no timing is shown trains do not stop.**

Accompanying symbols with the timings may modify the conditions of stop, e.g., **1f34, 1d34, 1§34,** etc. (See page 9).

Timings in light type accompanied by an asterisk (*) thus—1*34—indicate the time the train is due to pass through stations, junctions, etc., without stopping.

NUMBERING OF TRAINS

Distinctive type is used at the top of train columns in the time-table to denote the following:

Electric multiple unit trains (designated **Elec.** in train column) and Parcels Coaches are indicated by Train Describer Numbers in large type, thus **1500.** Suburban Goods and Light Locomotives are indicated by Train Describer Numbers in small type, thus—**9537.**

All other trains, including passenger and goods hauled by either diesel, electric or steam locomotives, diesel rail cars and rail motors, are indicated by their train numbers in small type—thus—**124.** Trains designated "Pass." and "Express" in the time-table are locomotive-hauled passenger trains unless otherwise stated.

Schedule Loads.—The schedule loads laid down for Goods trains, on Broad-gauge lines, may be exceeded by six (6) tonnes when, by so doing, an extra vehicle can be despatched by a train which would otherwise be under the schedule load.

Double-Headed Loads.—The load which may be hauled by two locomotives is the combined load of the locomotives employed.

The general conditions governing locomotives assisting in front of trains and the tracks on which double heading is permitted are shown on page 447.

Parcels Coaches and Motor Coaches.—(*i*) When Parcels Coaches and Motor Coaches, except Nos. 113 "M" and 156 "M" are used for hauling goods, Stock, or Horse-boxes, the number of vehicles hauled must not exceed eight (8) including Brakevan. The vehicle limit for 113 "M" and 156 "M" is governed by the load set out in clause (*ii*).

(*ii*) The maximum load for all Parcels Coaches and Motor Coaches (except as set out in clause (*iii*) must not exceed the following :—

Ruling Grade	Trailing Load	Ruling Grade	Trailing Load
Level	410 tonnes	1 in 50 ..	.. 125 tonnes
1 in 200	285 „	1 in 40 ..	.. 100 „
1 in 100	215 „	1 in 30 ..	.. 70 „

(*iii*) When Motor Coaches Nos. 113 "M" or 156 "M" are used for shunting purposes in Jolimont Yards a maximum trailing load of 560 tonnes may be hauled.

Diesel Fordson Tractors.—Maximum load hauling or propelling on level is 230 tonnes. The maximum load on grades at a speed of 5 miles per hour is as follows; Grade 1 in 50, 30 tonnes; 1 in 75, 65 tonnes; 1 in 100, 85 tonnes; 1 in 110, 90 tonnes; 1 in 200, 150 tonnes. (See page 447).

MOMENTUM GRADES.

Attention is particularly directed to the instructions regarding momentum speeds included in the footnotes to the various Load Schedules. Unless otherwise specified, the instructions refer to loads above three-fourths of the full load, and the speed shown must be attained to take load over the grade.

It must be remembered that the speeds specified as being necessary to ascend certain grades are subject to any special speed restrictions for the time being in force, and if the prescribed speed cannot be attained because of some restrictions of the kind, the load must not be exceed that which the locomotive could haul over the grade without the aid of momentum.

Distance Shown in Load Schedule Footnotes.—The distance quoted in the footnotes is in every instance in accordance with that shown in the Grades Book.

LOCOMOTIVE RUNNING SCHEDULES.

The following instructions are applicable to the Loads and Locomotive Running Schedules published in the Working Time-tables :—

(*a*) **Goods Trains.**—The schedules for Goods trains represent the time necessary to run each section with the specified load under average conditions.

(*b*) **Double-headed Trains.**—Trains assisted in the front by another locomotive are to be run to the same Locomotive running schedules authorised for trains hauled by one Locomotive, unless special schedules are provided.

(*c*) **Through Goods Trains.**—The Locomotive Running Schedules for through Goods trains are based on the Loads which a Locomotive can haul over the Ruling Grade between recognized Terminal Stations and provide for these trains stopping at certain stations, viz:—

Recognized Terminal Stations.
Stations where Engine Requirements are taken.
Stations where Engine Power is changed.
Stations where trains have to stop to Test Brakes.

Should the train stop at any other station *en route*, an allowance of two (2) minutes over and above the Through schedule is to be allowed at each such station where the train stops.

The Running Schedules for Through Goods trains, except where schedules applicable to special loads are provided, are based on the Ruling Grade Loads between the recognized Terminal Stations shown hereunder :—

Page	Section and Terminal Stations	Page	Section and Terminal Stations

419	Mordialloc to Melbourne	423	Melbourne and Broadmeadows
418	Baxter and Mornington	431	Melbourne and Sunshine
419	Mornington and Baxter	433	Newport and Sunshine

(*d*) **Roadside Goods Trains.**—The Locomotive Running schedules for Roadside Goods Trains are based on the Sectional Loads and proportions of those Loads, and provide for trains stopping at all stations.

Light Locomotives.—(*i*) The running schedule for a "Light" Locomotive, two "Light" Locomotives attached or in either case with only a Brakevan attached, shall (subject to the instructions on pages 435 to 447), be equal to the schedule for the fastest stopping Passenger or Mixed train, as the case may be, for the section over which the Locomotive runs, unless a special schedule is issued to the contrary.

See pages 446, 447 for speed of light Locomotives.

(*ii*) In every case where a brakevan is attached to the Locomotive or Locomotives, the train must be signalled as a "through" Goods Train; but before sending the "is Line Clear" Signal, each Signalman must inform the Signalman in advance, by telephone, that the train consists of a Locomotive (or Locomotives) and brakevan.

It will be the duty of the Driver to maintain the speed of his train as near to the maximum permissible speed as the load and grade will allow.

Vehicle Limit.—The vehicular limit will be governed by the loads specified for the various classes of Locomotives.

(u) STOCK ON UP TRAINS FOR NEWMARKET.

1. The loads which can be pushed from the Up Main line into the Newmarket Yard are as under:

CLASS	S or X	B	T	Y	W	..	..	..	..	..	..
LOAD	1830	1625	1220	760	660	..	..	..	..	..	..

2. When it is necessary for any Up Goods train to shunt at Newmarket during passenger traffic, the Signalman at Kensington must be advised by the Central Train Controller, and the Signalman receiving this advice must immediately confer by telephone with the Yard Foreman at the Cattle Yards Siding and ascertain whether or not there is a clear Road for the train to arrive on. If there is not a clear Road, or for any other reason the Yard Foreman is not in a position to accept the train, the Signalman must promptly advise the Train Controller, who will then arrange for trains being held at Essendon or dealt with as shown in clause 3 hereof. The Yard Foreman must promptly advise the Signalman and Central Train Controller when he is in a position to deal with the train, and the time that trains are held up at Essendon must be limited to the shortest possible period.

3. No train must be uncoupled on the Main Line at Newmarket for shunting purposes. When required to detach vehicles, the whole of the train must, if practicable, be shunted to the Cattle Yards. If this cannot be done without causing delay, it must be sent on to Melbourne Yard, where the Newmarket loading must be detached and returned promptly.

4. Special boards of a triangular shape, painted white, with black lettering, are erected on the left-hand side of the Up Line between Newmarket Junction and Kensington to indicate to Drivers of Up North-Eastern Line live stock trains which are to be shunted to the Yard at Newmarket, the point at which they must bring the locomotive to a stand, so that the rear of the train will be clear of the Junction Points. The Boards are lettered "75 Vehicles," "65 Vehicles" and "55 Vehicles." The "75 Vehicles" Board is erected near Automatic Signal No. E172, the "65 Vehicle" Board 71 .5 metres nearer Newmarket Station and the "55 Vehicle" Board a further 71 .5 metres nearer Newmarket Station.

Up Goods trains must not stop at Newmarket Station for relief purposes.

Relief Locomotive Crews or Guards must proceed direct to Newmarket Yard, where relief is to be effected after train has set back into the siding.

All concerned must see that the setting back movement is smartly performed, and thus avoid detentions to suburban traffic.

LOCOMOTIVES ASSISTING GOODS TRAINS FROM UP MAIN LINE TO THE CATTLE YARDS

When "Up" Goods or Live Stock trains are to be assisted by a locomotive in the rear from the "Up" Main line to the Cattle Yards at Newmarket, the following procedure is to be adopted by the Drivers concerned:—

1. The train must be stopped with the rear end well clear of the Junction points at Newmarket. To ensure this, special Location Boards for trains consisting of equal to 55, 65 and 75 vehicles respectively are erected on the Left-hand side of the "Up" line between Newmarket Junction and Kensington to indicate to Drivers the point at which they must bring their engines to a stand in accordance with the number of vehicles on the train.

2. After stopping, the Driver must see that the brake pipe pressure is reduced 20 lbs. below normal and leave the Brake Valve in Lap position. He must then close the Brake Valve Isolating Cock, return the Brake Valve to release position, with the No. 4 Brake Valve, or running position with A6–ET or A7–EL equipment and watch the air pressure gauge for the Brake pipe pressure to rise. This will indicate to him that the Assisting locomotive Driver has taken charge of the Air Brake.

3. On receiving the necessary Fixed and Hand Signals code whistles are to be exchanged and the train is ready to proceed. It must be controlled and stopped where necessary by an application of the Air Brake by the Driver of the assisting locomotive.

SPEED OF LOCOMOTIVES OR TRAINS, CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES AND LOCOMOTIVE AXLE LOADS.

SPEED OF LOCOMOTIVES OR TRAINS.

1. The **maximum** speed is the **highest speed allowed** on any portion of the Line.

2. **Speed of Trains.**—It must be clearly understood by Locomotive Drivers, Electric Train Drivers, Rail Motor Drivers and Guards that the maximum permissible speed authorised for the line and for the type of train must not, under any circumstances, be exceeded over any portion of the journey. In any instance where the times shown in the Working Time-table to run any section conflict with the maximum permissible speed authorised for that particular section, or with any safe working or other instruction, the Time-table times are not to be adhered to, and the matter is to be promptly reported to the Co-ordinator of Time-tables and Metropolitan or District Superintendent by Stationmasters and others engaged in Train Running. Drivers must bring the matter under notice of any Superior Officer, who must report the matter to his Superintendent, and in addition, forward a copy of his report direct to the Co-ordinator of Time-tables.

3. The maximum speeds laid down in respect of the various lines, or portions of lines, are subject to:—
   (i) the provisions of Regulation 59;
   (ii) the special speed shown on pages 444 to 447 inclusive;
   (iii) such **temporary** speed reductions as are shown from time to time in the Weekly Notice or other printed or written instructions; and
   (iv) the special speeds laid down in clause 8 hereunder, and clause 9, page 436.

4. The running of locomotives **tender first** is subject to the instructions on page 447 relating to tender first running. (See also Sub-section (c) Clause i, page 447).

5 (i) Victorian bogie goods vehicles having "P" as the last letter for their classification may be attached to passenger trains and, except in the case of "ZP" brakevans, run at the speeds laid down for passenger trains. Express Goods trains consisting solely of bogie passenger vehicles (except suburban motors) and–or Victorian bogie goods vehicles having the letter "P","F" or "X"as the last letter of their classification, with the exception of loaded Tank Wagons classed "TWF" or "TWX", may run at speeds laid down for Express Goods trains. The maximum speed for "ZP" brakevans and Tank Wagons classed "TWF" or "TWX" is laid down in Special Rates of Speed, clause 4, page 446.

(ii) When any goods vehicle, including "Z" and "ZL" brakevans, without "P", "F" or "X" as the last letter of classification is attached to any train, the goods train speed laid down for the various lines must not be exceeded without the special authority of the Chief Mechanical Engineer.

(iii) It will be the duty of the Guard to inform the Driver at the commencing point of the train of the Maximum Speed allowed due to the classes of vehicles included in the train and the Driver or Guard, if relieved, must pass this information on to his relief.

6. Drivers, Firemen and Guards must keep a good look-out for hand signals, which will be exhibited at the various localities where **temporary** speed reductions are in force in accordance with the Regulations. It must, however, be understood that repairs of lines may be necessary at other places besides those mentioned in the Weekly Notice or other printed or written instructions, and of which, owing to their urgency, it has not been possible to give previous notice. Drivers must, therefore, be always on the look-out and be prepared to **stop or run at reduced speed** whenever and wherever hand signals are exhibited. (See General Appendix, respecting Special Permanent Way Signals).

7. Stationmasters, Signalmen, Guards, Gangers and others must promptly report through their superior officers any case in which a train runs in excess of the speed laid down and such report must be forwarded to the Head of the Branch without delay.

8. **Maximum Speed for Trains Hauled by Certain Classes of Locomotives.**—The maximum speeds permissible on any line for various classes of locomotives, with train attached, are shown hereunder:—

Class	Miles per Hour	Class	Miles per Hour	Class	Miles per Hour	Class	Miles per Hour
B (Diesel Electric)	70	F (Diesel Electric)	20	R	70	W (Diesel Hydraulic)	20
D 3	60	H (Diesel Electric)	45	S (Diesel Electric)	70	X (Diesel Electric)	70
E Electric 1102–1111	40	J	50	(See Note 3)		Y	40
		K	50	T (Diesel Elect.)	60	Y (No. 175) (Diesel Electric)	60
		L (Elect.)	70			Narrow Gauge NA	20

Note 1 :—The maximum speeds laid down for locomotives in clause 8 hereof are subject to the maximum speeds laid down in respect to various Lines or portions ofLines, and to the conditions above and also on pages 442 to 447 inclusive.

Note 2 :—See page 446 for speed of a locomotive or locomotives with a brakevan of fixed-wheel base only attached, and for speed of light locomotives.

Note 3 :—The maximum speed for trains hauled by "S" Class Diesel Electric Locomotives when Hostler's End leading is 30 M.P.H. and when leading Hostler's End in Station Yards 10 M.P.H. Set back movements when driven from Hostler's End are not permitted.

9. **Maximum Speeds for Rail Motor Trains**—The maximum speeds permissible on any Line for rail motor trains are as shown hereunder :—

Rail Motor Trains	Maximum Speeds † Without any 4-wheeled Vehicle attached
Diesel Electric Rail Motor	60
Diesel Rail Car (Walker type) 102 H.P. except No. 4	45 See notes
Diesel Rail Car (Walker type) 102 H.P. (No. 4)	50
Diesel Rail Car (Walker type) 153 H.P.	50
Diesel Rail Car (Walker type) 280 H.P.	60 (without trailer) 50 (with trailer)
Diesel Rail Car (Air Conditioned) 600 H.P. Nos. 40, 41	70

† See Clauses 3 and 5, page 435.

Note :—(*a*) Although passenger trains are permitted to run over certain lines at 70 miles per hour, the maximum speed of any passenger train hauling a Diesel Electric Rail Motor must not exceed 60 miles per hour.

(*b*) The maximum speeds shown above for Rail Motor Trains are subject to the Maximum Speeds laid down for Passenger Trains for the line or portion of the line over which the Rail Motor is running and to the conditions imposed hereunder and on pages 435 to 447 inclusive. Where any goods vehicle is attached, the speed laid down on page 446 for the type of vehicle concerned must not be exceeded.

(*c*) For maximum speeds for Rail Motor Inspection Car, see General Appendix.

CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES.

Except where otherwise provided, the following are the particulars of the classes of locomotives that are allowed to run over the various broad gauge lines. The words "**and lighter.**" in respect of some lines or portion of lines, mean locomotives of a lighter axle load than the class specified. (See instruction page **67** of W.T.T. Addenda for engine axle loads.)

1. Except where instructions to the contrary are in force the classes of locomotive allowed to run on any particular line, or portion of a line, may also be worked on any siding connected therewith.

2. In a case of special emergency, the District Engineer may authorise the running for one return trip, of a heavier class of locomotives (excluding "B" and heavier classes) than specified for a particular line.

3. (a) On the branch line specified hereunder, locomotives of a heavier axle load than those ordinarily authorised in the foregoing list to run over such branch line, may, when necessary for shunting purposes, and subject to Block Working Rules, be placed on the branch line at the station named; in every such case the speed specified herein for the local movement on the branch line must not be exceeded. See also clause (b).

Station	Branch Line	Class of locomotive that may be used for Shunting on Branch lines	Speed
Altona Junction ..	Altona	"R" and lighter	Miles per Hour 10

(b) The locomotive must not proceed further than is necessary to clear the junction, and unless the return movement be governed by a fixed signal, the locomotive or train must not be allowed to foul the junction until the Driver or Guard has been verbally instructed to do so by the Signalman.

4. **Light Locomotives.**—(*a*) Two light locomotives, coupled, may be run over any line on which Double-heading is authorised, subject to the maximum speed for Double-headed trains not being exceeded, subject also to the condition that the permission applies only to locomotives of the class authorised to run and on such line.

(*b*) Except as shown hereunder, not more than two light locomotives are permitted to run coupled unless specially authorised by the Chief Traffic Manager.

(*c*) Three light locomotives coupled are permitted to run between Spencer Street and Newport Workshops.

5. **Pier and Wharf Lines:**—"R", "S", "B", "H" or "X" Class locomotives are not permitted to run on any pier or wharf line, unless specially authorised.

SPECIAL RATES OF SPEED.

The Maximum Speed laid down in clause 1, 2, 3 and 4 hereof are subject to the Maximum Speed laid down in respect of various Lines or portion of Lines and to—

(i) *the provision of Regulation 59;*

(ii) *such* **temporary** *speed reductions as are shown from time to time in the "Weekly Notice" or other printed or written instructions: and*

(iii) *the Special Speeds laid down in Pages 435, 436, clauses 8 and 9.*

1. Curves:—(a) Every curve, with the exception of those referred to in clause 2 hereof, that is of such a radius as to render necessary any modification of the foregoing rates of speed, is indicated by a **curve board** (see diagram in margin), placed on the left-hand side of the line at the entrance to the curve. The number shown on the Curve Board indicates, **in miles per hour, the maximum speed** allowed when going round the curve. It is pointed at one end, and is so placed that the pointed end indicates the direction of the curve, right-hand or left-hand, as the case may be. The speed must be reduced before the Locomotive or train enters on the curve, and the indicated speed must not be exceeded until the whole of the train is clear of the curve.

(b) The following tables give respectively the maximum speed around curves of certain radii on Suburban lines, and on all other lines. These speeds agree with those shown on the Curve Board.

(ii) Over facing points held by hand	15	15
(b) On the following lines the speed restrictions specified hereunder will apply over facing points worked from a locking frame or otherwise securely fastened or over trailing points:—		
DANDENONG LINE between Oakleigh and Dandenong	25	50‡
MORNINGTON LINE, between Mordialloc and Mornington	25	50‡
HEALESVILLE LINE, between Ringwood and Healesville	25	50‡

(ii) Over facing points held by hand	10	10

‡ Where the through road is on a curve, the speed passing over points is limited by the maximum speed indicated on the curve board, provided this does not exceed the maximum permissible speed over points.

When a Locomotiveman is exchanging a Staff with a Signalman standing on ground level, the train must be brought to a stand in order that the exchange may be effected safely.

‡‡‡ **Note:**—When a Locomotiveman on an "S" Class Diesel Locomotive running Hostler's End Leading is receiving a Staff from or delivering a Staff to or exchanging a Staff with a Signalman either on Platform level or ground level the locomotive must be brought to a stand in order that the operation may be safely effected.

(b) **Express Goods Trains**—At various locations, a Speed Board (See diagram in margin) placed on the left-hand side of the line at a suitable distance before reaching a Signal indicates that **Express Goods Train** Speed must be promptly reduced to not more than the figure in miles per hour shown on such board until sighting the next Fixed Signal. The train will then proceed according to the aspect displayed.

(c) **Passenger Trains**—At various locations, a Speed Board (see diagram in margin) placed on the left-hand side of the line at a suitable distance before reaching a signal indicates that passenger Train Speed must be promptly reduced to not more than the figure in miles per hour shown on such board until the sighting of the next fixed signal. The train will then proceed according to the aspect displayed.

(d) **Goods Trains**—At various locations, a Speed Board (see diagram in margin) placed on the left-hand side of the line at a suitable distance before reaching a signal indicates that Goods Train speed must be promptly reduced to not more than the figure in miles per hour shown on such board until sighting the next fixed signal. The train will then proceed according to the aspect displayed.

LIGHTING OF SUBURBAN ELECTRIC TRAINS.

GENERAL INSTRUCTIONS.

A co-operative effort by the Staff associated with train working is necessary to obviate complaints from suburban train passengers regarding the absence of and/or incomplete lighting in electric trains. The following instructions are issued for the guidance of all concerned.

Electric Train Drivers and Guards, when preparing trains and units for service, should be particularly careful to check that the lighting of each carriage is working.

Action should be taken to have any defect rectified, if possible, by the Equipment Examiner before the train or unit is brought to the platform.

To ensure that lighting facilities are in good order for the commencement of the evening peak traffic **Electric Train Drivers and Guards must, where time permits, test the Carriage Lights at Terminal Stations during the day** by switching the lights " on " before leaving their respective vans and examining lights whilst " changing ends "—lights to be switched " off " when change over is completed. If any defect in carriage lighting be detected during the tests the Driver must complete a Train Defect Message (R.S. 218B) and hand it to the employe in charge at the terminal station, obtaining a signature on the butt of the form. The employe receiving the Train Defect Message must immediately telephone particulars thereon to the Train Controller who will arrange for the Equipment Examiner to be in attendance on arrival of the train at Flinders Street or Princes Bridge as the case may be. The completed R.S. 218B is then to be forwarded to Supt. Metropolitan Train Running, Room 10, Flinders Street.

All members of station staffs are to keep a close watch on trains passing through their stations during the hours of darkness and in every instance where the whole or portion of a carriage is observed to be in darkness the Train Controller must be immediately advised so that arrangements can be made for the Equipment Examiner to be in attendance on arrival of train at Flinders Street or Princes Bridge as the case may be.

Officers-in-Charge at terminal stations are to arrange, as far as practicable, for a close check on trains " standing off " in Yard to see that interference with lamps and fittings does not occur during the " Stand Off " period.

Note:—When " Up " trains are brought to a stand at Signal No. 268 (Up Home signal to Princes Bridge) with the rear carriages under the road bridge at Wellington Parade South during daylight, the Guard of red type trains and E.T. Driver of Harris trains are to switch on the lights in the rear carriages.

LIGHTING OF SUBURBAN ELECTRIC TRAINS DURING DAYLIGHT HOURS.

The carriages of all trains must be lighted while passing through tunnels and entering platforms Nos. 12 & 13 at Princes Bridge during the hours of daylight and in this respect the following instructions must be carried out.

" Red Trains "

Electric Train Drivers preparing seven carriage Red trains at Flinders Street for service on the Princes Bridge–Clifton Hill lines during the hours of daylight must test the lights on the carriages of the centre unit and leave them switched on whilst docking into the platform. Drivers preparing seven carriage trains at outstations to run into Princes Bridge must test the lights of the centre unit and pull the switch rods at the ends of the carriages to the **off** position but leave the **Dynamotor** and **Bus Line Switches** closed.

The platform staff at West Richmond (for stopping trains) and Westgarth (for non-stopping trains through West Richmond) will switch on the lights of the carriages of the centre units on all seven carriage Up trains by operating the switch rods on the end of the carriages to the " ON " position and extinguish the lights on all " DOWN " trains by operating the switch rods to the " OFF " position.

It is of the utmost importance that platform staff at West Richmond, when operating the switch rods do so in a smart manner, so as to quickly extinguish the " ARC " formed when the switch is closed or opened. **The switches must not be left in a partly open or closed position as this will result in the switch being burnt out.**

Any switch rods difficult to operate must be promptly reported to the Platform Supervisor at Princes Bridge who will inform the Equipment Examiner.

The Electric Train Driver and the Guard will switch on the lights of the units at their respective ends when the train departs Jolimont on the "Down" and West Richmond on the " Up " and extinguish them when the train has passed out of the tunnels.

They will also switch on the lights at their respective ends just prior to entering the platforms at Princes Bridge and extinguish them after the train has departed from platforms.

Harris and Silver Trains.

The Electric Train Driver will be responsible for switching the lights of Harris Trains on in ample time to ensure that the train is fully lighted when passing through tunnels and also when entering the platforms at Princes Bridge. The lights must be extinguished after the train has passed through the tunnels and also has departed from the platforms at Princes Bridge.

10 and 11 East Platforms.

The two West end carriages must be lighted on all trains entering and departing from 10 and 11 East platforms during the day.

All trains arriving at Flinders Street and Princes Bridge during the hours of darkness are to be watched by the platform staff and should any carriage be noticed unlighted the attention of the Driver and Guard is to be drawn to the matter so that the lights may be promptly attended to.
