New Aurizon skeleton container flats, five packs and well wagons continue to be hauled to Forrestfield and railed with trails taking place of single wagon and well wagon to Hines Hill and return on June 5th and 11th. Owing to trackwork continuing on Lloyd Street grade separation project access to old Midland yard and flashbutt were not available when new EMU set 107 was due to be delivered. The EMU was hauled in a short train to Jumperkine remote bi directional main in Avon Valley to run round and be able to access old workshops on June 5th. Rail grinding programme took place on lines Narngulu to Mullewa and south to Tilley on Perenjori line, also on south west main Kwinana to Picton. PTA continues to undertake night rail grinding and track works on all lines, with crews moving between lines each week. Mineral Resources locomotives have returned from attention interstate with NRs being replaced by MRL units. T387 that was on hire to Roy Hill and working ballast trains at the Port Hedland unloading facilities was de-hired and departed interstate on June 18th. Roy Hill also de-hired the four reconditioned CFCLA ex Robe River CM40-8M locomotives that are now stored in Wedgefield.

EMU set 45 on Armadale service parallel with Australind test train going under Moore Street Bridge 2/6.

EMU set 25 that hauled Australind test back in Claisebrook yard June 2nd.
