After almost five months stored in West Kalgoorlie yard, Q4010 received replacement wheels and was towed on 426 freight to Forrestfield workshops on 31st October.

Watco's DR1564 and 1565 (former WAGR D class, also worked in Tasmania for several years) finally entered revenue service for their new owner in early November, working Avon Valley ballast trains.

NSW's 8206 arrived in Kalgoorlie at the end of October, but was returned east two days later. 8165 arrived a week later, went to Esperance but has since returned to West Kalgoorlie and has worked a couple of shuttles of empty hoppers to and from Parkeston. 8222 is currently restricted to Esperance port shunter. Rail movement of Kooly ore resumed on 6th November, one train each way per day at the moment, each has three MRL locos and 106 hoppers. Around half a dozen hoppers of an empty train derailed near Salmon Gums on 11th November, possibly due to a washaway after heavy rain in the area. Services on the Esperance line resumed on 17th November.

A loaded BHP ore "run away" after the driver climbed off to check a wagon at Hester on Monday 5/11, it had to be deliberately derailed at Turner's Siding for safety reasons. Four locos and most of the 268 hoppers were destroyed.

RHAs 1025 & 1026 on pink hoppers await their official launch the next day, 3rd October. Photo: John Mathews

Q4001 runs the BP shunt at Kewdale, 3rd October.
