COMBINED REGIONS WORKING TIMETABLE

The attached copy of the Combined Regions Working Timetable, will take effect as from Sunday 11th October, 1987, replacing the Sunday 15th February, 1987 publication.

All concerned to carefully check this issue and bring under notice of the Train Planning Manager, any inaccuracies which may have occurred.

Suggestions for improvements to services or format are welcomed.

Present covers and dividers are to be retained.

All concerned to note and arrange.

P.J. CASE,
Manager,
Operations Scheduling & Control.

North Eastern Region	AW6
Eastern Region	AW7
Metropolitan Region	AW8

GENERAL NOTES

A copy of every new issue of the WORKING TIMETABLE BOOK, or section of the book, or amendment thereto, is to be supplied to all concerned in accordance with Regulation 8.

It is imperative that each Stationmaster carefully check this timetable, regarding the timing of trains, crossing arrangements, etc., so far as his own station or the stations he supervises are concerned. He will be held responsible for promptly bringing under notice of the Train Planning Manager, Level 3, Transport House and the appropriate Regional Operations Manager, any inaccuracies.

PASSENGER TRAIN AND RAIL MOTOR RUNNING. Depot stations must obtain full particulars from guards of the late running of Passenger Trains and Rail Motors. In the event of any time being lost by the locomotive, the cause, also locomotive number and class, must be ascertained from the Driver, and the Train Controller advised. Drivers will require to explain the cause of any time lost that in the aggregate exceeds the time gained on the journey.

When a Passenger train or Rail Motor is blocked at a roadside station the Train Controller must be advised by the Stationmaster at the station at which the block occurred, and if the train that caused the block was running late the cause of such late running (whether overtime in section or other cause) must be given if ascertainable.

Country trains to and from Melbourne shown in the Working Timetable are not available for inter-station passenger travel within the suburban electrified area unless otherwise specified in the Time table.

Freight Trains — Maximum scheduled speeds. All speeds shown are in kilometres per hour.

TIMETABLE REFERENCE SYMBOLS

Passenger and Rail Motor trains must stop at stations where scheduled in the timetables. Where the times of arrival and departure of trains are not both stated, the times shown are of those of departure from stations.

Where the time for the train is shown without the addition of one of the undermentioned symbols or other special reference, a definite stop must be made.

Where the following standard symbols, ††, *, d, u, and ● are utilized with or without, a time being shown, they indicate how the train shall be dealt with at a station.

The symbols referred to and their application to the timetable are as follows:—

††—Trains operate only if required as arranged by the Manager, Operations Scheduling and Control, Daily Operations Manager, Regional Senior Train Controller or Depot Stations.

M—Monday **Tu**—Tuesday **W**—Wednesday **Th**—Thursday **F**—Friday **Sa**—Saturday **Su**—Sunday.

With the addition of 'O' to indicate that the train will operate on that day or days only or the addition of 'E' to indicate that the train will not run on that day or days.

*—Will not stop where symbol shown in schedule, or where no time shown in schedule.

u—Pick up only.

d—Set down only.

D—Stops for Departmental Purposes only.

P—Stops to pick up school students only.

S—Stops to set down school students only.

●—When practicable train must depart at the earlier time shown.

← Continued from previous column.

→ Continued in subsequent column.

TIME ALLOWANCE IN PASSENGER TRAIN SCHEDULES

Additional time is allowed in schedules as follows:—

[3] Recovery time for temporary speed restrictions and other contingencies.

② Extra time for pathway requirements.

STATION REFERENCE SYMBOLS

ES Electric Staff Stations.

† Staff Stations, at which the Staff, a Staff Ticket, or a Line Clear Report must be received before starting, and delivered on arrival.

NC No one in charge stations.

T.R. TIME

A "T.R. Time" shown in the working timetable is the time that the train locomotive is required at the T.R. Point.

T.R. POINT

A "T.R. Point" is where a locomotive entering traffic encounters the first signal upon leaving the confines of a locomotive depot.

METHOD OF NUMBERING TRAINS

Passenger Trains — 1st Digit - 8 (Passenger Train), 2nd Digit - O (Northern), 1 (Western), 2 (South Western), 3 (North Eastern Broad Gauge), 4 (Eastern), 6 (Standard Gauge), 3rd and 4th Digits - Down trains odd numbers Up trains even numbers.

Freight Trains — All regularly scheduled freight trains will be four digits as under:—
1st Digit - 9 (Freight Train), 2nd Digit - to show the region/line in which the train runs, or to which it runs if it originates in another region. Trains running to the Central region will show the region from which they pass into the Central Region - O (Northern), 1 (Western), 2 (South Western), 3 (North Eastern Broad Gauge), 4 (Eastern), 6 (Standard Gauge), 8 (Metropolitan), 3rd and 4th Digits - Down trains odd numbers Up trains even numbers - trains which change direction en route ending in zero.

Light Locomotives — Same principle as for Freight trains except that the first digit will be zero.

Inter-regional Freight Trains — All trains programmed at short notice if inter-regional, four digits, using the principle applying to regularly scheduled trains above. If running within one Country Region only, 4 digits as under:—
1st Digit - Regional Code, 1 (Western), 2 (South Western), 3 (North Eastern Broad Gauge), 4 (Eastern), 5 (Northern), 2nd, 3rd and 4th Digits - Down trains odd numbers Up trains even numbers - trains which change direction en route ending in zero.
